DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it is not present on a single sheet free of extraneous text. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102/103

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 10 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over PCT International Application No. WO 02/14477.

The reference teaches, on page 3, lines 14-20, the preparation of isolated anthocyanin pigments from *Garcinia Indica*.

This claim is a product-by-process claim. While the reference does not teach the same process as instantly claimed, it is the position of the examiner that the resulting

Art Unit: 1755

product is the same. As stated in MPEP 2113 [R-1] "[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985) (citations omitted). "The Patent Office bears a lesser burden of proof in making out a case of prima facie obviousness for product-by-process claims because of their peculiar nature" than when a product is claimed in the conventional fashion. In re Fessmann, 489 F.2d 742, 744, 180 USPQ 324, 326 (CCPA 1974). Once the examiner provides a rationale tending to show that the claimed product appears to be the same or similar to that of the prior art, although produced by a different process, the burden shifts to applicant to come forward with evidence establishing an unobvious difference between the claimed product and the prior art product. In re Marosi, 710 F.2d 798, 802, 218 USPQ 289, 292 (Fed. Cir. 1983). Accordingly it is the position of the examiner that the resulting product is the same absent evidence showing otherwise as the reference teaches the preparation of a pigment from *Garcinia Indica* and applicant has not shown that the use of the claimed process produces a product that is different from that of the reference.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 4, 6, 9 and 11-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4 the phrase "chosen from the group consisting of" is not proper Markush terminology and accordingly the claim is confusing. The term "chosen" should be changed to -- selected --.

Claim 6 is confusing as it depends from itself.

In claim 9 the phrase "said step" lacks proper antecedent basis.

In claim 11 it is unclear as to what is meant by "A combination". What is the combination that is being claimed?

In claim 14 it is unclear as to how the extract can comprise a concentrate. Is applicant trying to say that the extract is in the form of a concentrate?

In claim 15 it is unclear as to how the extract can comprise an aqueous solution. Is applicant trying to say that the extract is in the form of an aqueous solution?

Claim 16 is confusing as it is unclear as to what claim 11 has to do with a product. What exactly is applicant trying to claim? Is applicant trying to say that the combination is one of the recited products? Clarification is requested.

In claim 19 it is unclear as to how the extract can comprise the recited products. Is applicant trying to say that the extract is present in the recited products? Clarification is requested.

Claim 20 is confusing as it is unclear as to how the combination of claim 11 is obtained. The phrase "the color stabilized red pigmented extract" lacks proper antecedent basis.

Allowable Subject Matter

7. Claims 1-3, 5, 7 and 8 are allowed.
8. Claims 4, 6, 9 and 11-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Information Disclosure Statement

9. The initialed references have been considered by the examiner however they are not seen to teach and/or fairly suggest the instant invention. The 2 Japanese references, however have not been considered as 37 CFR 1.98(a)(2) requires a legible copy of each cited foreign patent document as well as a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language.
